adding life & cost savings to OTR tyres

Another Tytec tyre & cost saving revolution

Introducing

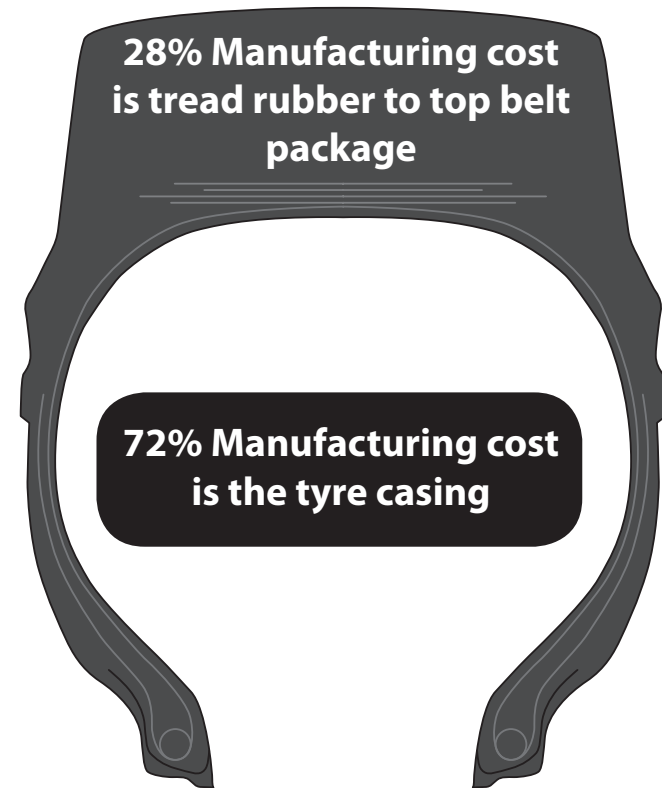

This new XT XTRATREAD Extension System arrives following substantial investment in technology, R&D, equipment and training.

The XT XTRATREAD System offers significant life and cost savings to the end user and can provide up to 100% extended tyre life.

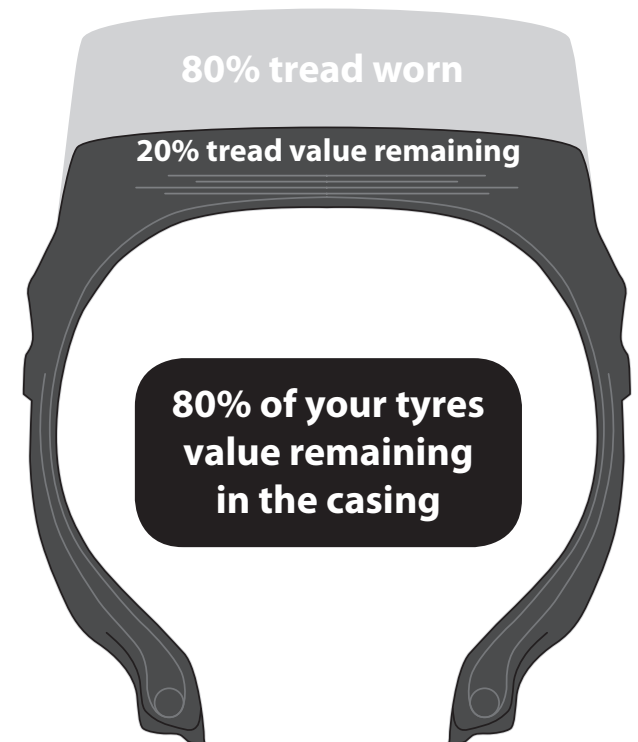

OTR tyre manufacturing costs

OTR tyre manufacturing costs are 72% casing and 28% tread rubber when worn to the top belt package. This cost breakdown demonstrates the importance of extending the life and adding value to your OTR tyre investment.

Average tyre wear is approximately 80% tread utilisation.

If you scrap your OTR tyre after one use you are throwing away 80% of its value.

The XT XTRATREAD technology can add up to 100% additional life to your OTR tyres and will provide cost savings up to 24% on your tyre budget.

So what is XT XTRATREAD?

XT XTRATREAD is a revolutionary ground breaking technology developed to extend the life of OTR tyres and deliver major cost savings to your OTR tyre budget.

The XT XTRATREAD technology allows us to rebuild your front tyre fitments with tread still remaining on them. By rebuilding your tyres this way, can double the life of your original tyre purchase.

The savings are simple to justify. The Tytec rubber we place back onto your new tyre is on average 50% cheaper than the cost of new tyre rubber. The more of our rubber you use the higher the cost savings.

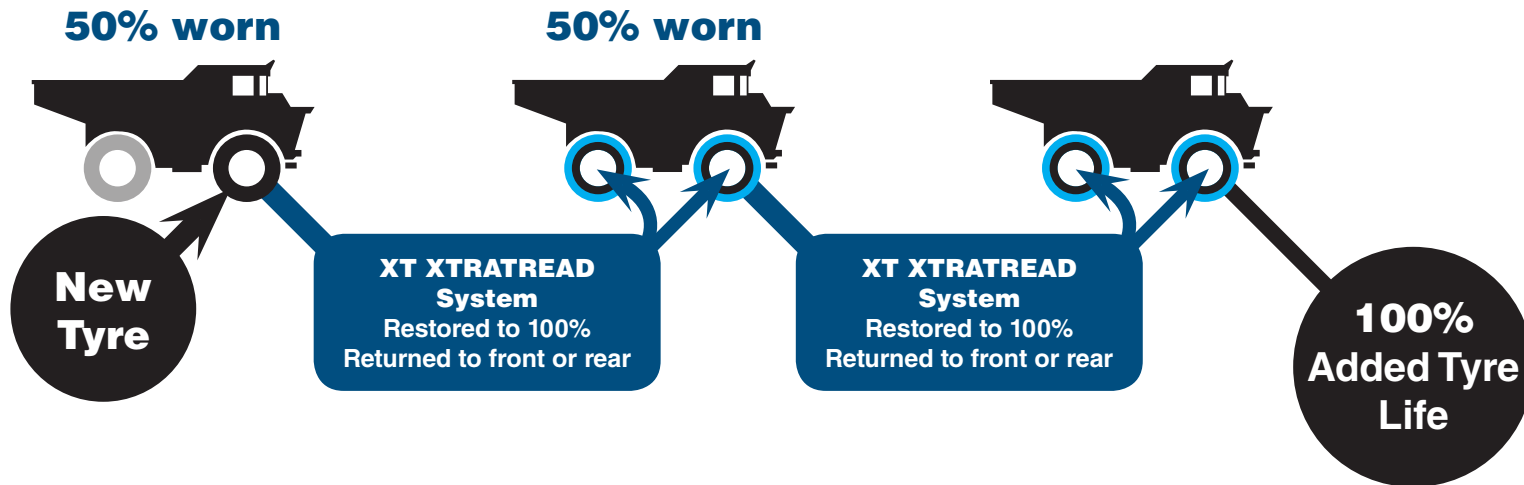

XT XTRATREAD OTR tyres have proven performance in mine sites across the globe.

If you're serious about saving millions of dollars on your tyre budget speak to your Tytec XT expert today

With no change to your onsite tyre fitment policy the XT XTRATREAD System can double your tyre life - here's an example

- **New tyre life** - 50% tread wear (front fitment)
- **First XT XTRATREAD life** - 50% tread wear
- **Second XT XTRATREAD life** - 50% tread wear

Saving up to 24% on your tyre budget.

There's only benefits

- No change to onsite tyre fitment policy
- No impact on TKPH
- Proven performance
- No CapEx required
- Reduce your Cost Per Hour
- Half your new tyre allocation by extending the life of your OTR tyres
- 50% reduction in price over new tyres
- Reduce your tyre disposal costs by up to 50%
- Complete site to site solutions using our partner Tytec Logistics
